Above you can see the tube running from the dome on the roof, through the attic and into the dark room in your home.

Tubular skylights from Sun In are an excellent way to bring beautiful natural light into a bathroom while maintaining privacy.

Tubular skylights are also a great way to light dark hallways. You will never need to worry about turning the hall light off again.

Laundry/Utility rooms are also great places to put a tubular skylight.

Walk in closets are also another great place for tubular skylights. You won't have to worry about fading your clothes either because the skylights filter out harmful UV rays.

A dark kitchen can be transformed through the addition of natural light with one of Sun In's tubular skylights.
