

Highs and Lows of Webmastering

So, I decided to redo my website with this software, Joomla!, and I really liked the results. Then, somehow the logo I had made disappeared from my server. Then, while trying to upload a new file to my server, I broke the whole thing and had to start from scratch. So, here it is, my new website. All of the content from before is lost now, so I will have to start over with blog entries for installations once it warms up and I get back to work. In the mean time, I will be posting daily blogs about commonly asked questions I have heard from prospective Solatube Owners in the past that may or may not be covered in the FAQ section of the website.
