Welcome to Sun In Lighting, Central Illinois' Daylighting Specialists. Sun In specializes in the sale and installation of tubular skylights for residential applications. A tubular skylight from Sun In is: Energy Star rated for its low heat gain/heat loss backed with a 10 year parts warranty and lifetime craftsmanship installed in one day or less with no mess and without any structural alteration

a good way to reduce electricity usage while improving the appearance and comfort of your home More information about our products and services

Sun In uses high-quality, state of the art tubular skylighting systems. A tubular skylight uses a dome on the roof to collect light and highly reflective tubing to transmit that light through your attic and into the living areas of your home. Inside the light is diffused throughout the previously dark space with a tasteful, unobstructive ceiling fixture. Sun In works throughout Illinois but works primarily in Bloomington-Normal, Champaign-Urbana, Decatur, Peoria, and Springfield Illinois. For service please visit the contact page and Mike will contact you within 24 hours.
